## SCOPE

S-CUBE 2010 provides an ideal venue to address the research challenges facing system
development and software support for wireless sensor network-based systems that have the
potential to impact society in many ways. Currently, wireless sensor networks enable
innovative and interesting application scenarios that may support a large amount of different
applications including environmental monitoring, seismic sensing, smart-homes, disaster
prevention, building automation, object tracking, nuclear reactor control, fire detection,
agriculture, health care, utility infrastructure monitoring, and traffic monitoring.
